

Dear All,

**For the submission of class project you need to prepare:**

1. Project report in word file (C\_2024XXX\_StudentName\_BreifTitle.docx)

As per the format given

2. Presentation in PPT form (C\_2024XXX\_StudentName\_BreifTitle.pptx)

Title slide must include your recent passport photograph, project tile etc.

- a. **Research Paper Presentation:** As per the given template (10-20 Slides) which include title of your study, objective behind choosing the research topic area, Research papers considered with their findings, table examples, challenges encountered during the analysis and how they were addressed and key findings or takeaways from the study.
  - b. **Teaching/Lecture:** As per the given template (10-25 Slides) which include title, objective, lesson plan or flow, suitable example to illustrate concepts of lecture, key highlights or feature of the lecture, takeaways from the lecture delivered.
  - c. **Programming:** As per the given template (2-6 Slides) which include title, objective, program flow application with suitable examples, some of the screen shots of your program output, any issue faced while implementation and how you come out with the solution, features of your programming project.
3. Video file for project demonstration (C\_2024XXX\_StudentName\_BreifTitle.mp4)  
Demonstrate your project in 1-5 minutes and submit as video file in mp4 format.
  4. A Compressed file (C\_2024XXX\_StudentName\_BreifTitle.rar)

Please keep following files in this folder

- I. All program files including function files (MATLAB/PYTHON files)
- II. ReadMe.txt file containing detailed instruction on how to run the program, web link to download/installation of third-party software/application used in the project, installation of any library required (in case of Python).
- III. Sample files to use as input in your program (if applicable)
- IV. Output files generated from your program (if applicable)
- V. Papers referred for project completion
- VI. Any other relevant files

Compress/Zip this folder, then unzip the folder and check your program by executing from this folder to make sure that all the relevant files are stored in the folder and working fine. Then Compress/Zip this folder again.

***Submit above mentioned four items via USB drive to Rahul/Akash in FFF lab on or before December 3, 2024.***

Best wishes

Prashant
